

[Costello, pdf](#)

No.1 for grain quality

- Exceptional grain quality
- Highest specific weight on the AHDB RL
- High yielding Group 4 wheat
- Short, very stiff straw
- Excellent disease resistance
- Early to ripen
- Excellent sprouting resistance

OVERVIEW

Costello is a hard Group 4 feed wheat combining all the features now desired on farm – exceptional grain quality in all conditions, excellent disease resistance, high yields and short, stiff straw.

The superb grain quality and excellent disease resistance of Costello, across a range of seasons and conditions, provide a wider range of market opportunities and offer the grower security, both in crop management and at harvest.

PERFORMANCE

Costello produces high treated yields in all locations, rotations and on all soil types. Like JB Diego, Costello performs well in all weather conditions, an important asset on UK farms in recent years.
