RGT Goldfinch	8	9	9	7	5	R	R
KWS Extase	7	8	6	7	4	-	-

RGT Goldfinch has been identified as having resistance at the young plant stage by AHDB screening.*

Source: AHDB Winter wheat NL 2-year report 2022-23

*Wheat Brown Rust Watch List AHDB

RGT Goldfinch has a very good foliar disease resistance profile. It also has resistance to both BYDV & OWBM, giving growers the option to grow insecticide-free quality wheat. End users have observed excellent quality for bread making.

Depending on location, we would advise the optimum sowing window for RGT Goldfinch is mid-September to the end November. It is capable of being sown until the end January but our guidance is that sowing after the end of November is likely to limit the chance of achieving the best potential from this variety.
