KINGSFORD QUALITY MIXTURES

**Suppliers of Quality
Seeds to Scotland**

AgriiTM

SELECTING QUALITY SEEDS

Within, you will find our range of mixtures designed specifically for the Scottish grass farmer. Our mixtures have been designed, developed and produced in Scotland by us. Therefore, you can be confident that our Kingsford Quality Mixtures will perform for you.

*All our Kingsford Quality Mixtures have been developed and designed from local and independent data derived from our experience, and from the SRUC Grass Levy Scheme trials. This levy scheme is voluntary, and invaluable for us to ensure that **only the very best SRUC 1st choice varieties from all major seed breeding programmes** are included in our mixtures for our customers.*

Using the best varieties is only part of the story. The benefits of sowing the correct varieties can be negated by sowing poor quality seed. Our seed lots endure a meticulous selection process and are maintained to ensure that only seed lots of the highest germination, purity and vigor are used in our mixtures.

We are pleased to support and contribute to the invaluable trial work of the SRUC.

NEXT STEPS

Before selecting your mixtures, why not read our Sowing and Growing section on page 11.

KINGSFORD YTHAN

3-5 years intensive cutting and grazing

A flexible mixture containing Hybrid and Perennial Ryegrasses providing high yields of quality, high sugar grass for cutting and grazing. May be cut 2-3 times per year with excellent early spring growth and quality aftermath grazing.

Abereve	Hybrid Ryegrass (T)	2.50 kg
Gosford	Intermediate Perennial Ryegrass	1.75 kg
Fintona	Intermediate Perennial Ryegrass (T)	2.00 kg
Seagoe	Intermediate Perennial Ryegrass (T)	2.00 kg
Strangford	Intermediate Perennial Ryegrass	2.00 kg
Gracehill	Late Perennial Ryegrass (T)	2.00 kg
Iona	Medium Leaved White Clover	0.50 kg
Barblanca	Large Leaved White Clover	0.25 kg

- 13kg/Acre
- Mixture options available with/without clover or extra clover
- Organic version available

KINGSFORD UGIE

3-4 years intensive cutting and grazing with red clover

Highly productive red clover mixture giving high protein and sugar yields for maximum animal performance. Best suited to cutting but flexible enough to graze also.

Abereve	Hybrid Ryegrass (T)	1.00 kg
Seagoe	Intermediate Perennial Ryegrass (T)	1.50 kg
Fintona	Intermediate Perennial Ryegrass (T)	1.50 kg
Ballyvoy	Late Perennial Ryegrass	1.50 kg
Gracehill	Late Perennial Ryegrass (T)	2.00 kg
Rozeta	Red Clover	2.50 kg

- 10kg/Acre
- Mixture options available with/without clover or extra clover
- Organic version available

KINGSFORD NITH

3-7 year intensive silage mixture

A mixture designed for maximum silage output and quality. Suitable for 3-5 cuts per season.

Strangford	Intermediate Perennial Ryegrass	2.00 kg
Galgorm	Intermediate Perennial Ryegrass	2.25 kg
Caledon	Intermediate Perennial Ryegrass (T)	2.25 kg
Seagoe	Intermediate Perennial Ryegrass (T)	2.25 kg
Callan	Late Perennial Ryegrass	1.40 kg
Ballintoy	Late Perennial Ryegrass (T)	1.40 kg
Gracehill	Late Perennial Ryegrass (T)	2.00 kg
Barblanca	White Clover	0.30 kg
Iona	White Clover	0.15 kg

- 14kg/Acre
- Organic version available

KINGSFORD AD

3-5 Year specialist mixture designed for anaerobic digestion

Our AD mixture is designed for multiple cuts per season to feed digesters. It has been tried and tested over several seasons and gives consistently good dry matter and tonnage over the weigh bridge.

Barclamp	Hybrid Ryegrass	5.46 kg
Abereve	Hybrid Ryegrass (T)	5.04 kg
Fintona	Intermediate Perennial Ryegrass (T)	3.50 kg

- 14kg/Acre

KINGSFORD SPEY

4-6 years intensive cutting and grazing

The very best quality all round mixture. Kingsford Spey is our most popular mixture providing excellent early season growth whilst maintaining reliable, quality bulks of Hay or Silage.

The sward base is dense therefore resisting poaching and weed encroachment, keeping the sward productive. To ensure maximum animal performance we have included only the most palatable Perennial Ryegrass with high WSC (Water Soluble Carbohydrate) content.

Gosford	Intermediate Perennial Ryegrass	1.00 kg
Strangford	Intermediate Perennial Ryegrass	2.00 kg
Seagoe	Intermediate Perennial Ryegrass (T)	1.00 kg
Aberspey	Intermediate Perennial Ryegrass (T)	1.25 kg
Aberchoice	Late Perennial Ryegrass	1.00 kg
Ballyvoy	Late Perennial Ryegrass	2.00 kg
Ballintoy	Late Perennial Ryegrass (T)	2.00 kg
Gracehill	Late Perennial Ryegrass (T)	1.00 kg
Baronaise	Timothy	0.75 kg
Crusader	Medium Leaved White Clover	0.20 kg
Iona	Medium Leaved White Clover	0.50 kg
Barblanca	Large Leaved White Clover	0.30 kg

- 13kg/Acre
- Mixture options available with/without clover or extra clover
- Organic version available

The Bradley family at Tillyminate, Alan Frank and James, have used our Spey mixture for a number of years, winning the NORGRASS Society competition for best bailed silage for two years running; and overall best silage with their 2022 crop.

KINGSFORD DEVERON

4-8 year permanent mainly grazing mixture

A great long term grazing mixture, also providing a productive silage cutting option. A very dense, palatable mixture which will perform over the long term, offering early growth and sustainable grazing throughout the season.

The mixture also includes persistent high yield clover varieties specific to intensive grazing.

Gosford	Intermediate Perennial Ryegrass	1.50 kg
Galgorm	Intermediate Perennial Ryegrass	2.00 kg
Fintona	Intermediate Perennial Ryegrass (T)	1.00 kg
Seagoe	Intermediate Perennial Ryegrass (T)	1.00 kg
Callan	Late Perennial Ryegrass	1.75 kg
Aberchoice	Late Perennial Ryegrass	1.00 kg
Aberplentiful	Late Perennial Ryegrass (T)	1.25 kg
Ballintoy	Late Perennial Ryegrass (T)	2.00 kg
Comer	Timothy	1.00 kg
Laura	Meadow Fescue	0.50 kg
S184	Small Leaved White Clover	0.25 kg
Crusader	Small/Medium Leaved White Clover	0.50 kg
Iona	Medium Leaved White Clover	0.25 kg

- 14kg/Acre
- Mixture options available with/without or extra clover
- Organic version available

KINGSFORD CARRON

4-6 years specialist quality cutting and grazing mixture

A dual purpose grazing and cutting mixture aimed at producing a high quality and quantity of grass. The mixture includes later heading varieties which makes it ideal for an upland silage making situation to maintain quality.

Gosford	Intermediate Perennial Ryegrass	2.00 kg
Ballintoy	Late Perennial Ryegrass (T)	1.50 kg
Aberchoice	Late Perennial Ryegrass	1.00 kg
Callan	Late Perennial Ryegrass	1.50 kg
Ballyvoy	Late Perennial Ryegrass	2.00 kg
Gracehill	Late Perennial Ryegrass (T)	2.75 kg
Aberplentiful	Late Perennial Ryegrass (T)	1.75 kg
Comer	Timothy	0.50 kg
Iona	Medium Leaved White Clover	0.50 kg
Crusader	Medium Leaved White Clover	0.30 kg
Barblanca	Large Leaved White Clover	0.20 kg

- 14kg/Acre
- Mixture options available with/without clover or extra clover
- Organic version available

KINGSFORD HERBAL LEY

4-8 year permanent mainly grazing mixture with added herbs

Herbal leys are becoming more popular as they provide many benefits for livestock, biodiversity and soil health. They are generally made up of grass, legumes and herb species which creates a more diverse forage. Multispecies leys have different rooting structures and lengths which also help with soil conditioning. The long deep tap roots also mine minerals from greater soil depths, making them available to the livestock. Kingsford Herbal Ley combines the best of our Kingsford mixtures with Clovers, Chicory and Plantain to give you a forage mixture that provides yield and quality. Ideal for growers looking to maintain production but bring in the added benefit of a multispecies ley.

Gosford	Intermediate Perennial Ryegrass	2.50 kg
Seagoe	Intermediate Perennial Ryegrass (T)	2.00 kg
Strangford	Intermediate Perennial Ryegrass	1.45 kg
Ballyvoy	Late Perennial Ryegrass	1.25 kg
Glenrock	Late Perennial Ryegrass	1.50 kg
Ballintoy	Late Perennial Ryegrass (T)	2.35 kg
Comer	Timothy	1.00 kg
Laura	Meadow Fescue	0.50 kg
Crusader	White Clover	0.40 kg
Iona	White Clover	0.50 kg
Puna II	Chicory	0.40 kg
Tuatara	Plantain	0.15 kg

- 14kg/Acre
- Organic version available

KINGSFORD DON

Renovation mixture

An all ryegrass mixture to inject new life into tired or damaged swards. Perennial Ryegrass is the most productive part in any sward but over the years the ryegrasses decline allowing less productive and less nitrogen responsive weeds and grasses to persist. Kingsford Don is made up of vigorous Perennial Ryegrass to ensure rapid establishment into the competitive environment of an existing sward.

Barclamp	Hybrid Ryegrass	2.00 kg
Fintona	Intermediate Perennial Ryegrass (T)	3.00 kg
Seagoe	Intermediate Perennial Ryegrass (T)	3.00 kg
Ballintoy	Late Perennial Ryegrass (T)	2.00 kg

- 10kg/Acre
- Organic version available

KINGSFORD DEE

Renovation mixture (with clover)

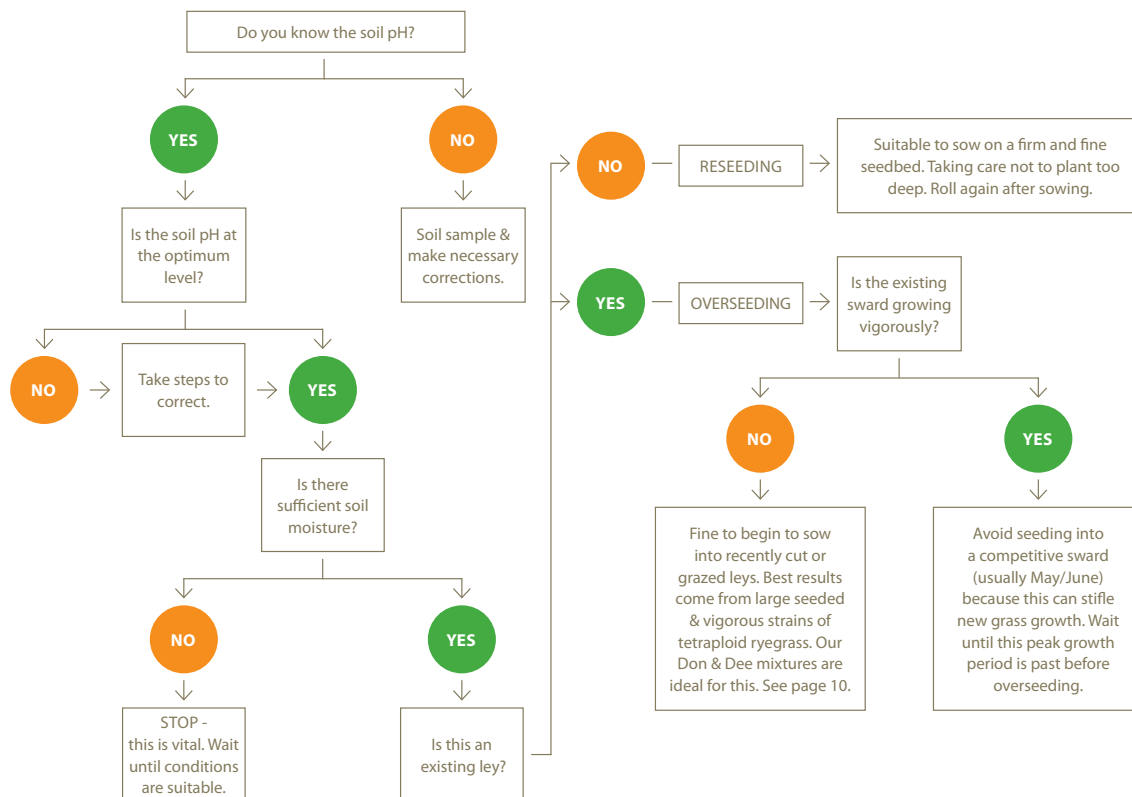

Similar to Kingsford Don mixture, but with the inclusion of clover to help fix some of the all-important free nitrogen.

Barclamp	Hybrid Ryegrass	2.00 kg
Fintona	Intermediate Perennial Ryegrass (T)	2.50 kg
Seagoe	Intermediate Perennial Ryegrass (T)	2.50 kg
Ballintoy	Late Perennial Ryegrass (T)	2.00 kg
Crusader	White Clover	0.35 kg
Iona	Medium Leaved White Clover	0.50 kg
Barblanca	White Clover	0.15 kg

- 10kg/Acre
- Organic version available

SOWING AND GROWING

*Getting back to basics before selecting your mixtures is always time well spent.
We think these are the key things to consider before starting your "sowing and growing" in the season.*

RESEED OR OVERSEED?

Obviously, there is a place for both reseeding and overseeding. However, overseeding is definitely something to consider. It's a great way of improving existing grass leys which may have seen better days for a variety of reasons. It allows the existing grass to be kept and improved whilst minimising cost, time and risk.

It's important when overseeding to resume grazing gently around 4-5 weeks after sowing. Just be careful they don't graze too close, to avoid damaging new seedlings.

SPECIAL MIXTURES

As well as the extensive range of mixtures we offer within our catalogue, we regularly create customised mixtures to suit our customers' specific requirements.

We are licensed to mix grass seed, and therefore would be pleased to amend an existing mixture or devise an entirely new one to suit your needs. We also fully understand the importance of creating a mixture which is compliant with any scheme(s) you are entered into.

NEED SOME HELP IN THE GROWING SEASON?

Our team (see contact details on page 27) would be delighted to advise on any of these issues. We also provide a full range of GPS, soil sampling and agronomy services. See pages 13-15 for more detailed information on these areas.

FORAGE CROPS

FORAGE CROP SELECTOR

We supply a full range of forage crops. We hope you find our forage crop selector below helpful.

Despite having a wide range of forage mixtures within our catalogue, we appreciate that you may require your own specially formulated mixtures for specific situations which we are happy to provide. Please get in touch to discuss your needs.

SWEDES

High Energy Winter feed. Excellent winter hardiness. Some varietal Clubroot resistance.
Drill May – June.
Ready to use from 20 weeks onwards.

[See page 17](#)

KALE

Excellent Crude Protein content. Winter hardy. Suited for Cattle and Sheep. Some varietal Clubroot resistance.
Drill May – June.
Ready to use from 16 weeks onwards.

[See page 18](#)

FORAGE RAPE

Fast growing. High protein levels. Ideal for fattening lambs.
Drill May – August.
Ready to use from 13 – 15 weeks after sowing.

[See page 18](#)

STUBBLE TURNIPS

Fast growing catch crop. Ideal for low input systems. Ideal for finishing lambs.
Drill June – August.
Ready to use from 12 – 14 weeks after sowing.

[See page 19](#)

MAINCROP TURNIPS

High yielding. Can be sown later than Swedes. Ideal for low input systems.
Drill May – July.
Ready to use from 16 weeks after sowing.

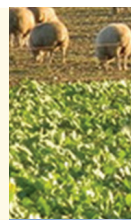

[See page 19](#)

FORAGE RYE

Excellent establishment. Winter grazing. Early spring growth. Grazing and cutting. Dual cropping.
Drill August – September.

[See page 20](#)

KINGSFORD THRIVE

Winter lamb finishing mixture. Prolonged grazing November-March. Three-way mix for maximum live weight gain.
Drill June – July.

[See page 20](#)

KINGSFORD HAUGHTON

Fast growing. Best used before Christmas. Suited for Cattle and Sheep.
Drill June – August.
Ready to use from 12 – 15 weeks after sowing.

[See page 21](#)

KINGSFORD LONACH

Fast growing. Best used Post Christmas. Suited for Cattle and Sheep.
Drill May – July.
Ready to use 14 – 16 weeks after sowing.

[See page 21](#)

SWEDES

Excellent high energy winter feed with DM yields of around 10 tonnes/ha. Swedes are a very winter hardy feed and are ideal for feeding to cattle or finishing lambs. Swedes are usually strip grazed in the field or harvested for use later on.

Kenmore	Early season use. Good yields.
Marian	Early use. Some Clubroot resistance. Suitable for culinary and livestock feed.
Gowrie	Main crop. Some Clubroot resistance. Good Mildew resistance.
Lomond	Main crop. Some Clubroot resistance. Good Mildew resistance.
Invitation	Late season use. High dry matter. Clubroot and Powdery Mildew resistance.
Magres	Late season use. High dry matter. Suitable for culinary and livestock feed.

- *Graded and Natural Seed available*
- *Other varieties available upon request*

SEED SOWING RATES FOR SWEDES

Quick guide to weight of seed per acre:

	Width 4"	Width 5"	Width 6"
Row 18"	325g	265g	215g
Row 20"	290g	235g	195g
Row 22"	265g	215g	180g
Row 24"	245g	195g	165g
Row 26"	225g	180g	150g
Row 28"	210g	170g	140g

KALE

Kale is a well proven forage crop which consistently produces very high yields. The crop has high protein content and can be fed to all types of livestock. Average DM yields of Kale are around 8 – 10 tonnes/ha. Kale can be fed to livestock by strip grazing in the field or zero grazing. Kale is also well suited for full season game cover.

Bombardier	High yielding, clubroot tolerant, tall variety.
Caledonian	High yielding and clubroot tolerant. Good lodging resistance and winter hardiness.
Keeper	Medium/short type, ideal for feeding to sheep. Good lodging resistance with a high dry matter content.
Maris Kestrel	A short leafy variety, ideal for fattening lambs. Popular all-round variety with good winter hardiness and a high leaf to stem ratio. Good sheep grazer.

- 2-4kg/Acre
- Natural Seed only
- Other varieties available upon request

FORAGE RAPE

A fast growing leafy catch crop with high protein content. Forage Rape has a flexible sowing period and is quite a low input crop which makes it very popular with livestock farmers.

Hobson	Great variety for finishing lambs. High digestibility and resistant to powdery mildew.
Gorilla	Great variety for finishing lambs. High digestibility and resistant to powdery mildew.
Swift (Hybrid)	Offers great regrowth ability and winter hardiness. Good all year-round performance but can be prone to bolt if it's sown too early.
Skyfall (Hybrid)	Bounceback brassica. Exceptional regrowth gives 2-3 grazings. Thrives in drier soils.

- 2-4kg/Acre
- Other varieties available upon request

MAINCROP TURNIPS

Maincrop turnips are faster growing than Swedes and are able to be sown slightly later. However, it is worth bearing in mind that they are less winter hardy. Maincrop turnips can be grown at higher elevations on less fertile soils.

Green Globe	High yielding white fleshed yellow turnip. More winter hardy than massif.
Massif	High yielding green top yellow turnip. Early season use and ideal for late sowing.

- *0.5-1.5kg/Acre*
- *Natural Seed only*

STUBBLE TURNIPS

This is a fast growing catch crop which can help to reduce winter feed costs. Stubble Turnips are a nutritious and highly palatable feed making it ideal for cattle and sheep. Average DM yields are in the region of 3.5 - 4 tonnes/ha.

Rondo	Winter hardy. Leafy, green skinned bulbing variety. Excellent disease resistance.
Samson	High yielding. Produces large purple tankard shaped roots. Highly palatable to both sheep and livestock. Excellent disease resistance.
Tyfon	Leafy Hybrid with regrowth potential. Minimal or no bulb.

- *2-4 kg/Acre*
- *Other varieties available upon request*

FORAGE RYE

Forage rye is becoming more popular for those looking for winter grazing for sheep, a very early bite in spring, followed by a cut of high yielding quality silage. It is well suited to later drilling in light or sandy soils on south facing fields. It gives an excellent mid-season entry for brassicas and allows growers the advantage of having two forage crops in the same field for the year. Italian Ryegrass can also be mixed though which prolongs the spring grazing program.

Lunator	Excellent winter hardiness and establishment. Fastest spring growth. Exceptional silage yields.
Humbolt	Excellent winter hardiness. Very early spring growth. Excellent tillering and vegetative growth ensures maximum intake and palatability

- Optimum Drilling Date: Mid August-September
- 60-75kg/Acre

KINGSFORD THRIVE

Winter lamb finishing mixture

Thrive is designed to be utilised for grazing lambs from late autumn to early spring. The three-way mixture gives excellent quality grazing through the winter months. The inclusion of Italian ryegrass also ensures the crop has good ground cover, keeping the animals cleaner. It also offers another grazing the following spring when the forage crops have been eaten off. Best established June-July.

Green Globe	High yielding white fleshed yellow turnip. More winter hardy than massif.	5%
Gorilla	Great variety for finishing lambs. High digestibility and resistant to powdery mildew. Clubroot resistant.	20%
Alamo	High yielding. Excellent establishment. Vigorous autumn and spring growth.	75%

- 9kg/Acre – 9kg packs

KINGSFORD HAUGHTON

Autumn/early winter cattle and sheep grazing mixture

This dual purpose mixture is ideal for both cattle and sheep grazing in the back end of the year. This mixture has proved very successful over the last few years after being direct drilled into old permanent grassland to give the field a break, before being reseeded the following spring. This has also been used as a catch crop after fallow with great results. Mixing Forage Rape with Maincrop Turnips helps to increase yields and protein content.

Massif	Yellow Turnip	10%
Hobson	Forage Rape	45%
Gorilla	Forage Rape	45%

- 2kg/Acre – 10kg packs

KINGSFORD LONACH

Winter cattle and sheep grazing mixture

Lonach is a dual purpose mixture designed for grazing by sheep and cattle post-Christmas. This more winter hardy blend gives excellent forage quality for grazing in the new year with a higher dry matter content. It can be direct drilled into fallow land or grassland post destruction. The mixture is designed for late winter keep following on from Haughton.

Massif	Yellow Turnip	15%
Maris Kestrel	Kale	55%
Gorilla	Forage Rape	30%

- 2kg/Acre – 6kg packs

GAME CROPS

KINGSFORD CORA

Can provide a full 2 years Gamecover - ideal for exposed areas. The Triticale in this mixture can resist rabbit damage, will produce cover, feed and also tolerate lower pH soil types.

Triticale	80%
Quinoa	2.5%
Forage Rape	7.5%
Mustard	5%
Fodder Radish	5%

- 20kg/Acre

KINGSFORD DEXTER

One year Gamecover mixture, very fast growing once established. Can help to smother out weeds and can also be sown as a recovery mixture. Will produce cover and feed for birds.

Mustard	33.33%
Quinoa	8.33%
Forage Rape	8.33%
Phacelia	16.67%
Yellow Blossom	16.67%
Sunflower	16.67%

- 6kg/Acre
- Full range of individual Gamecover seeds available

GDAS are members of the Game and Wildlife Conservation Trust and BASC.

GREEN COVER CROPS

Green manures and cover crops are becoming more popular and a great way to improve organic matter in soils. Growing a green manure will help to stabilise soils and sowing plants with deep rooting systems will help to open up the soil profile.

Once the crops have grown, they are usually incorporated into the soil where they start to break down, adding organic matter and raising the soil's fertility.

There is a vast range of green manures and cover crops available which can be mixed to suit your requirements. Please speak to our team for more information.

KINGSFORD SPRING COVER

Spring Cover is a mixture designed to cover all aspects of soil health biodiversity.

Vetch	55%
Crimson	20%
Phacelia	15%
Linseed	10%

- Optimum drilling – April and May
- 4-6kg/Acre

KINGSFORD GREEN MALT

We have developed Kingsford Green Malt to help towards growers reaching their sustainability targets for their malting barley crop. Designed to be drilled prior to a spring barley crop it improves soil structure, nutrient enrichment and Co2 sequestration.

Vetch	50%
Crimson	10%
Phacelia	5%
Buckwheat	35%

- Optimum drilling – July-September
- 5-8kg/Acre

KINGSFORD AUTUMN SOIL BUILDER

Autumn soil builder is designed to build nutrition and root mass. A very good option for soil health.

Vetch	50%
Global	15%
Fodder Radish	35%

- Optimum drilling – Aug/Sept
- 6-8 kg/Acre

KINGSFORD AUTUMN NITROFIX

Autumn Nitrofix is a mixture for securing nitrogen into your soil for the following crop in the spring. The vetch and rye mix fixes and holds nitrogen. Ideal for grazing after the 1st of January in the new year.

Forage Rye	80%
Vetch	20%

- Optimum drilling – Aug/Sept
- 25-40kg/Acre

KINGSFORD KIDS PLAY

Hardwearing universal landscape mixture (with rye)

Our most popular mixture for general landscaping, lawns, parkland, housing and industrial estates. This mixture gives rapid establishment, heavy wear tolerance and low maintenance.

Barorlando	Perennial Ryegrass	25%
Barchip	Chewings Fescue	10%
Rossinante	Strong Creeping Red Fescue	60%
Highland	Browntop Bent	5%

- 35g/m²

KINGSFORD PRIDE & JOY

Fine universal landscape mixture (no rye)

A fine, non rye version of our popular Kids Play for more ornamental uses. This mixture requires more intensive management to keep it at its best. This mixture gives a fine appearance, is low maintenance and tolerates closer mowing.

Barchip	Chewings Fescue	20%
Rossinante	Strong Creeping Red Fescue	35%
Maxima	Strong Creeping Red Fescue	40%
Highland	Browntop Bent	5%

- 35g/m²

KINGSFORD VERGE

Road verges mixture

For low maintenance road verges and motorway embankments where rapid establishment on poor soils is required.

Barorlando	Perennial Ryegrass	25%
Barchip	Chewings Fescue	38%
Bornito	Hard Fescue	30%
Highland	Browntop Bent	5%
Aberace	White Clover	2%

- 35g/m²

KINGSFORD SHADE

Shade mixture

For shaded areas under trees and building surrounds. This mixture is designed to be tolerant to shaded and droughted areas. It will establish rapidly in difficult soils, giving strong weed competition during establishment.

Samanta	Slender Creeping Red Fescue	10%
Barchip	Chewings Fescue	25%
Rossinante	Strong Creeping Red Fescue	45%
Highland	Browntop Bent	5%
Dasas	Rough Stalked Meadow Grass	15%

- 35g/m²

KINGSFORD HORSE Paddock

Long term horse pasture

Kingsford Horse Paddock is a specific equine mixture designed to give good seasonal growth throughout the grazing season. It also provides a dense sole, resistant to poaching. Although a grazing mixture, Kingsford Horse Paddock is also suitable for occasional cutting if required.

Callan	Late Perennial Ryegrass	2.00 kg
Fintona	Intermediate Perennial Ryegrass (T)	1.00 kg
Glenrock	Late Perennial Ryegrass	3.50 kg
Ballintoy	Late Perennial Ryegrass (T)	1.00 kg
Laura	Meadow Fescue	1.50 kg
Comer	Timothy	2.00 kg
Maxima	Strong Creeping Red Fescue	2.00 kg

- 13kg/Acre
- Mixture options available with Mixed Herbs
