

NUTRITION & SOIL HEALTH

An Integrated Approach

Nutrition & Soil Health

Agrii understands that balanced nutrition is a cornerstone of high performing arable crops and grassland regimes.

Which is why our agronomists are equipped with the most up-to-date research, analysis tools and fertiliser products to tailor nutrition programmes and ensure your soils are healthy, productive and capable of supporting high output crops.

Agrii's integrated approach to nutrient use efficiency encompasses:

- + Nutrient access by the crop
- + Soil condition and health
- + Nutrient supply and demand
- + Soil nitrogen
- + Precision agronomy
- + Nutrient management planning

NUTRITION & SOIL HEALTH

Precision Agronomy

Making informed precision farming decisions is not easy but Agrii can help. By providing you with an unrivalled precision farming data service backed by expert agronomist knowledge, you can ensure that the application of your inputs is timely, focused and, most importantly, leads to the best margin for each field. Wherever you are with adopting precision farming technology, we can help and guide you to develop its potential and harness the benefits for your business.

Nutrition Advice

Based on the most up to date independent research, Agrii agronomists provide advice on all aspects of soil health and optimum plant nutrition to ensure each of your fields can sustain high yielding crops. Utilising precision agronomy techniques and detailed analysis, we will create a tailored fertiliser plan that complies with environmental requirements and ensures the nutrition status of your soils is optimised.

All our agronomists are FACTS and BASIS qualified and can call upon in-house nutrition expertise for all crops.

Fertiliser Supply

Agrii's fertiliser portfolio offers competitive supply of the most comprehensive range of products in the market coupled with technical support services and advice. We understand that nutrition is the cornerstone of high performing arable crops and grassland regimes, which is why Agrii specialists are equipped with the most up-to-date research and the best fertiliser products to tailor your nutrition programmes so you can achieve the full potential from your soils.

Agrii's fertiliser service offers you a choice, from a comprehensive range of products made by well-known manufacturers of complex compounds, Ammonium Nitrate and Nitrogen Sulphur products, blended fertilisers, imports, liquids and speciality products.

For more information about our services please speak with your local contact or visit the website at www.agrii.co.uk for regional contact details.
