

Gatsby

Strong, safe and flexible

Maturity: Intermediate

Site Type: Favourable & Less Favourable

Sowing Type: Open & Plastic

Gatsby is an impressive variety in the field with flexible use for any situation, including for under plastic cover.

Massive ME and dry matter yields, combined with high starch content for energy rich forage. Gatsby maximises performance on any site.

Gatsby produces well-developed cobs that balance starch content with good fibre digestibility (59.3% CWD) to produce energy rich forage.
