

Gema

Say yes to Gema!

Maturity: Very Early

Site Type: Favourable & Less Favourable

Sowing Type: Open

For superb yields from an ultra early harvest!

Gema has very high starch content for assured maturity, providing energy dense feed ideal to balance grass silage rations. It has high starch yields from every hectare grown along with an excellent yield with exceptional earliness.

Strengths

- NEW! Expected to be listed as First Choice on the BSPB/NIAB 2022 List
- Ultra early maturing (MC12) delivering reliable results in a short growing season
- Ideal for short season rotation crop
- Tall plant for an impressive crop in the field
- Good standing ability and excellent early vigour
- Excellent resistance to Eyespot
