

# Winter Beans

## VESPA

- High yielding, stiff strawed variety | Treated Yield 108%
- New variety with high yield potential
- Equal best standing/straw strength
- Medium early maturity and medium to large grain size
- Yields 5% above Tundra

BREEDER: WHERRY & SON | UK AGENT: SENOVA

## BUMBLE

- Large seed with consistent yields | Treated Yield 104%
- Improving yields in recent seasons, 1% over Tundra
- Equal largest seeded winter bean variety, in some seasons suited to export for
- Splitting market or for hulling for fish food production
- Taller than Wizard and Tundra with slightly weaker straw

BREEDER: WHERRY & SON | UK AGENT: SENOVA

## TUNDRA

Widely grown established variety | Treated Yield 103%

- High yielding variety with good all round agronomics, the most widely grown variety
- Good straw strength with medium early maturity and medium to large grain size
- Suited to a wide range of soil types
- Consistent performance – yields 5% above Wizard

BREEDER: LIMAGRAIN | UK AGENT: LIMAGRAIN UK

## WIZARD

Large seeded grain favoured for some export markets | Treated Yield 98%

- Established variety, proven on a wide range of geographical situations
- Some market demand linked to large dimpled grain size and specific grain quality
- Good standing and straw characteristics, with good Ascochyta resistance

BREEDER: WHERRY & SON | UK AGENT: SENOVA

## HONEY

Earliest, shortest and stiffest strawed winter variety | Treated Yield 95%

- Best combination of maturity and straw, more suited to the West and Northern regions
- Produces large ovule grain suited to the premium markets
- Lower official yield data but benefits from higher plant density (32/26plants/m<sup>2</sup>)

BREEDER: WHERRY & SON | UK AGENT: SENOVA
