

KWS KERRIN

Winter Wheat

KWS W177 x KWS Santiago

SEEDING
THE FUTURE
SINCE 1856

The bankable barnfiller with proven performance

- Proven performance across contrasting seasons
- Good performance across a range of soil types and across the rotation
- High yielding when late sown

Like its parent, KWS Santiago, KWS Kerrin is making a strong name for itself in the Group 4 hard feed market. By providing a consistent performance across regions, soil types and drilling dates; it is a variety that is reliable and has proven very popular with farmers across the UK.

KWS Kerrin's disease package is robust, with sevens across the board for mildews and the rusts. Having OWBM resistance paired with a *Septoria tritici* score of 4.9, this gives the variety all round appeal and sets KWS Kerrin apart from its competition. Later sowing varieties has the benefit of increasing *Septoria* resistance; by sowing KWS Kerrin mid-October onwards 1/2 to 1 point in resistance can be effectively be added.

Additionally, KWS Kerrin has a good specific weight at 76.3 kg/hl and has a similar plant type and growth habit to KWS Santiago. Commercial experience supports our own data, suggesting that KWS Kerrin also has good resistance to sprouting.

Growers' View

KWS Kerrin has topped my wheat trial for the last three years. It's also yielded very well on the farm. This consistent high yielding performance is exactly what I'm looking for in a feed wheat.

Stephen Buckle, Limebar Farm, Boroughbridge

KWS Kerrin	
Yield (% treated controls)	
UK	102
UK untreated	79
Late sown	104
Light soils	102
Heavy soils	101
Disease	
Mildew	7
Yellow Rust	7
Brown Rust	7
<i>S. tritici</i>	4.9
Eyespot	5
<i>Fusarium</i>	6
OWBM	R
Agronomy	
Lodging (+ PGR)	7
Lodging (- PGR)	7
Height (cm)	85
Ripening (+/- Skyfall)	+1
Sp.Wt (kg/hl)	76.3
