	Status	RL Cand
	AHDB Region	UK
	Agrii Region	UK

Yield & Grain Quality - AHDB 2018-19, (Agrii 2017 Mean)

UK Treated G.O. (% of Controls) #	105
UK Untreated G.O. "	"
East/West region	103
North region	107
Oil Content (%)	46.4

Agronomic Characters - AHDB 2018-19, () = Agrii data 2017, [] = data supplied by the breeder

Autumn Vigour (1-9) ex Agrii	5.1
Spring Vigour (1-9) ex Agrii	-
Height (cm)	157
Stem stiffness (1-9)	8.0
Resistance to lodging (1-9)	8.0
Earliness of flowering (1-9)	5.0
Earliness of maturity (1-9)	6.0
Light leaf spot resistance (1-9)	6.0
Canker/Phoma resistance(1-9)	4.0
<i>Verticillium</i> tolerance (1-9)	-

Agrii Intelligence - Complementary Information

Speed of Development	Medium
Suitable for early drill	Yes
Late drill > early Sep	No
Pod shatter	No
Specific Genetic Trait	C/R
Soil type	All

Breeder /Agent LSPB

Variety Positioning

- An Recommended List candidate with a outstanding yield and very high oil content. It has performed well across the country with excellent performance in the North. It is in Agrii's trials for the first time this autumn and assessments to-date suggest that it has a similar growth habit to Mentor. It may therefore be more suited to the E&W regions rather than the far North but with a 10% yield advantage over Archimedes it is still well worth looking at.
- Suitable for all soil types. It is relatively tall with a stiff canopy and early maturity. It has good Light Leaf Spot resistance but relatively weak on Phoma and Stem Canker so this needs watching and spraying for.
