

Adding value to your crop marketing strategy

How can the Agrii/Glencore partnership help you?

The Agrii and Glencore partnership enters its 13th year in 2018. Together the two companies have made significant investment in R&D, personnel and new port facilities.

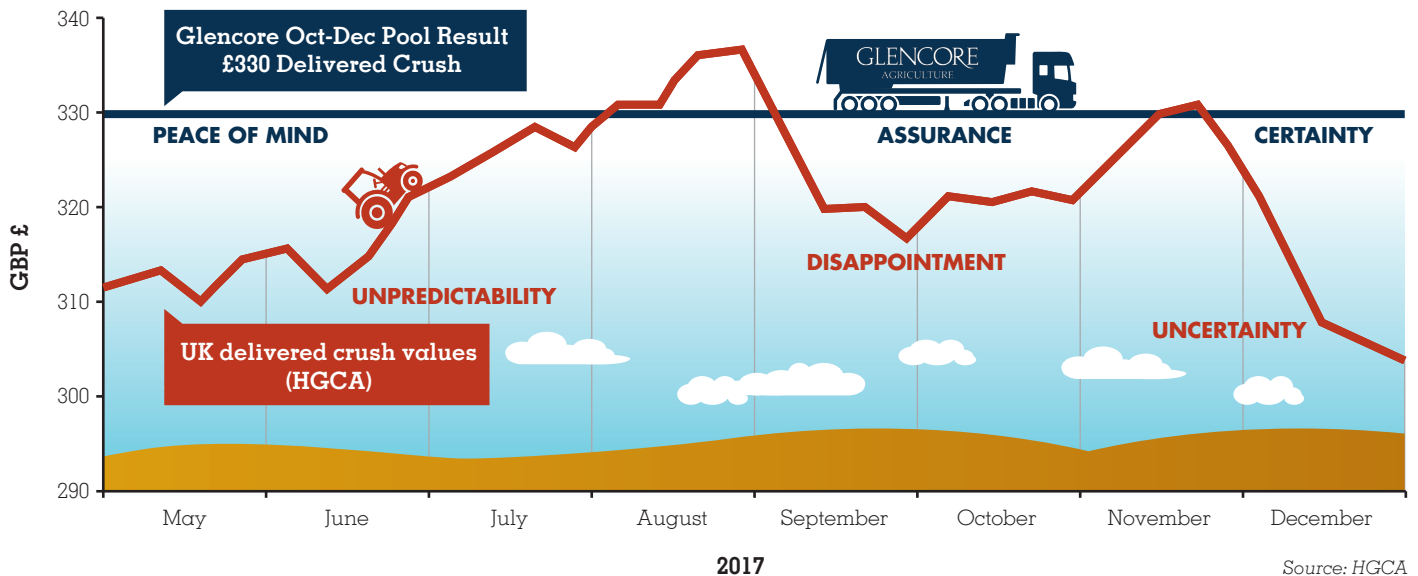

New varieties and techniques have been borne from Agrii's national research and development work. Agrii iFarms enable growers to preview forthcoming varieties, their management requirements and marketing options.

Agrii supplies seed and agronomy on over 30% of the UK oilseeds crop. Glencore Agriculture trades 30% of the global oilseeds crop. HOLL, cold crush, conventional and oilseeds export markets allow us to maximise on your returns when you market your produce via the Agrii/Glencore partnership. This combined capability allows us to provide our customers with more options to market your crops and greater assurance of meeting market specifications.

What does Glencore offer the grower?

- + Harvest storage deals – enabling efficient and timely movement
- + Minimum price contracts
- + Marketing Pools to suit all movement periods and cashflow requirements
- + Buyback Premium Contracts – High Oleic

UK Delivered OSR values October-December – Glencore Pool outperforms a volatile market
