# DK Impresario CL

<b>Status</b>	Agrii
<b>AHDB Region</b>	-
<b>Agrii Region</b>	E/W

**Yield & Grain Quality - AHDB 2018-19, (Agrii 2017 Mean)**

UK Treated G.O. (% of Controls) #	[96]
UK Untreated G.O. "	
East/West region	
North region	
Oil Content (%)	[45.0]

**Agronomic Characters - AHDB 2018-19, ( ) = Agrii data 2017, [ ] = data supplied by the breeder**

Autumn Vigour (1-9) ex Agrii	<b>8.1</b>
Spring Vigour (1-9) ex Agrii	-
Height (cm)	[152]
Stem stiffness (1-9)	[7.0]
Resistance to lodging (1-9)	[8.0]
Earliness of flowering (1-9)	[6.0]
Earliness of maturity (1-9)	[6.0]
Light leaf spot resistance (1-9)	[6.0]
Canker/Phoma resistance(1-9)	[8.0]
<i>Verticillium</i> tolerance (1-9)	-

**Agrii Intelligence - Complementary Information**

Speed of Development	Very fast
Suitable for early drill	No
Late drill > early Sep	Yes
Pod shatter	Yes
Specific Genetic Trait	CL, RLM7
Soil type	

Breeder /Agent      Dekalb

**Variety Positioning**

- DK Impresario CL is an alternative to DK Imperial CL but similar in many respects and was grown commercially on a significant acreage last year due to a shortage of DK Imperial seed. The feedback has been very positive.
- Very vigorous in the autumn and spring and shows early flowering and maturity. It has slightly better Light Leaf Spot than DK Imperial CL and the same pod shatter resistance genetics that is useful in reducing the number of Clearfield volunteers. It is early to mature.
- No information of *Verticillium* tolerance at this stage.
