Regional Rec AHDB (Agri)	N (UK)
Yield & Grain Quality, Agrii (2018-19)	
Gross Output (treated)	118
(Untreated)	96
Oil content (%)	46.2
Agronomic Characters, Agrii Ratings	
Autumn Vigour (1-9)	8
Spring Vigour (1-9)	7
Earliness of flowering (1-9)	5
Resistance to lodging (1-9)	6
Height (cm)	149
Earliness of maturity (1-9)	5
Disease resistance, Agrii Ratings	
Light leaf spot resistance (1-9)	7
Canker/Phoma resistance(1-9)	8
Verticillium tolerance (1-9) ex 2017	Good
Genetic Trait Information	
Suitable for later drilling (>early Sept)	Y
Turnip Yellows Virus Resistance	-
Pod shatter Resistance	Y
N-Flex (Higher nitrogen-use efficiency)	-
Yield & Grain Quality AHDB RL 2020, [] = limited	
UK Gross Output (treated)	101
East/West (treated)	101
North (treated)	103
Oil Content (%)	45.5
Agronomic Characters, AHDB, [] = limited	
Earliness of flowering (1-9)	6
Resistance to lodging (1-9)	8
Height (cm)	165
Stem stiffness (1-9)	8
Earliness of maturity (1-9)	5
Disease resistance, AHDB, Breeder	
Light leaf spot resistance (1-9)	7
Canker/Phoma resistance(1-9)	8
Soil type	All excluding fertile sites

Positioning

- Highest yielding hybrid over the past four years in Agrii trials
- Vigorous hybrid with excellent disease and pod shatter resistance

Summary

- It has consistently been one of the highest yielding variety on Agrii's every year for the past four years. High gross output (111%), high untreated yields (97%) and a high oil content (46.3%) make this a significant variety in Agrii's portfolio. Limited seed availability had delayed the widespread introduction of this variety to this season.
- Suitable for all soils and all regions. Its official Northern Recommendation should not limit the variety and it has been proven in Agrii's trials to perform across the UK especially in Cabbage Stem Flea Beetle affected areas because of its vigorous growth habit. Consistently one of the most vigorous hybrids in the autumn and quick to move away in the spring. Assessments in spring 2019 showed that it was one of the best varieties to cope with severe flea beetle larval infestations.
- Tall (165 cm) with excellent lodging resistance (8), and medium-early to flower (6) and mature (5). Outstanding disease resistance with Light Leaf Spot (7) and RLM7 Stem Canker resistance (8) giving it the equal top highest combined disease resistance on the Recommended List. Tolerant to Verticillium Wilt and contains the pod shatter resistance trait.
