Positioning

- Agrii's leading Clearfield hybrid
- Fast speed of development and pod shatter resistance

Summary

- Agrii's leading Clearfield variety with consistently high yield (94%) and reasonable oil content (43.9%). Very similar to its predecessor, DK Imperial, but with better disease resistance and slightly stiffer canopy. Suitable for all soil types and best drilled in the main drilling window through into September if conditions remain favourable.
- It is vigorous in the autumn and quick to re-grow in the spring and is relatively early flowering (5). Medium height (152 cm) and relatively stiff stem (6) with good lodging resistance (8).
- In addition to the herbicide tolerance genetics it also includes the RLM7 Stem Canker (8) gene, the pod shatter trait and average Light Leaf Spot resistance (5).
