

Regional Rec AHDB (Agri)	E/W
<b>Yield &amp; Grain Quality, Agrii (2018-19)</b>	
Gross Output (treated)	<b>113</b>
(Untreated)	<b>102</b>
Oil content (%)	<b>46.1</b>
<b>Agronomic Characters, Agrii Ratings</b>	
Autumn Vigour (1-9)	<b>7</b>
Spring Vigour (1-9)	<b>6</b>
Earliness of flowering (1-9)	<b>7</b>
Resistance to lodging (1-9)	<b>9</b>
Height (cm)	<b>135</b>
Earliness of maturity (1-9)	<b>5</b>
<b>Disease resistance, Agrii Ratings</b>	
Light leaf spot resistance (1-9)	<b>8</b>
Canker/Phoma resistance(1-9)	-
Verticillium tolerance (1-9) ex 2017	-
<b>Genetic Trait Information</b>	
Suitable for later drilling (>early Sept)	Y
Turnip Yellows Virus Resistance	-
Pod shatter Resistance	-
N-Flex (Higher nitrogen-use efficiency)	-
<b>Yield &amp; Grain Quality AHDB RL 2020, [ ]= limited</b>	
UK Gross Output (treated)	104
East/West (treated)	104
North (treated)	100
Oil Content (%)	45.6
<b>Agronomic Characters, AHDB, [ ]= limited</b>	
Earliness of flowering (1-9)	6
Resistance to lodging (1-9)	8
Height (cm)	157
Stem stiffness (1-9)	8
Earliness of maturity (1-9)	5
<b>Disease resistance, AHDB, Breeder</b>	
Light leaf spot resistance (1-9)	6
Canker/Phoma resistance(1-9)	5
Soil type	All

**Positioning**

- Candidate for the E&W Recommended List
- Vigorous hybrid with high yields and a stiff canopy

**Summary**

- A new hybrid from the breeder of RGT Alizze and a new candidate for the East & West region. One of the highest gross outputs (113%) in Agrii's 2019 trials with a high untreated yield (102%) and high oil content (46.1%).
- Suitable for all soils, including fertile soils, and all regions up to and including Yorkshire. It has a vigorous autumn and spring growth habit and is relatively early to flower (6). Medium height (157 cm) with excellent lodging resistance (8), stem stiffness (8) and medium maturity (5).
- Reasonable Light Leaf Spot (7) resistance but its resistance to Phoma/Stem Canker is average (5) so this needs to be sprayed for in the autumn. Its tolerance to Verticillium Wilt will be assessed this season.
